TECHNICAL LEADERSHIP / SYSTEMS & AUTOMATION

+1 (702) 510-3295 | bjornarambula@gmail.com
bjornarambula.com | linkedin.com/in/bjorn-arambula

Technical service leader connecting industrial systems, project delivery and hands-on infrastructure. I build practical tools for coordinating work, including a relational Notion project system and self-hosted n8n automations. My experience spans scanner deployments, enterprise AV integration, software configuration, troubleshooting and technical handover.

PROFESSIONAL EXPERIENCE

Senior Service Manager / IT Leader

Viprotron NA, Aurora, CO | Jan 2023 - Present

- Lead industrial scanner deployments and service work, including installation, maintenance, calibration, software configuration and remote support.
- Configure IP assignments and troubleshoot hardware and software issues; develop repeatable procedures for installation and service.
- Built a Notion project-management system from scratch using related databases, rollups and native automations, connected with self-hosted n8n workflows.

AV Technician

Las Vegas Convention Center, Las Vegas, NV | Sep 2022 - Jan 2023

- Operated and maintained live-event AV systems, coordinated with clients and resolved time-sensitive technical issues.
- Supported preventive testing, equipment inventory and procurement.

Design Associate

Electrosonic Inc, Las Vegas, NV | Apr 2021 - Apr 2022

- Produced Revit and AutoCAD device and wiring packages and maintained AV equipment data.
- Coordinated project plans, timelines, budgets and site verification with architects and construction teams.

AV & Telepresence Engineer

EOS IT Solutions, San Jose, CA | Feb 2018 - Sep 2020

- Installed, commissioned and supported enterprise AV and telepresence systems in Fortune 500 client environments.
- Coordinated field integration with clients and contractors, resolved design discrepancies and delivered user training.

Selected work & capabilities

SELECTED SYSTEMS WORK

Connected project operations

Notion + n8n | Viprottron

- Designed multiple connected databases, using relations and rollups to bring project and task information into useful views.
- Combined native Notion automations with n8n workflows for service-report notifications, advance parts reminders and related-record updates.

Self-hosted infrastructure & portfolio

Proxmox + Linux + Docker | Independent

- Manage virtual machines, local storage, NAS connectivity, backups and supporting services in a personal server environment.
- Host a static portfolio in a dedicated Debian VM with Caddy, Docker and Cloudflare Tunnel. Document deployment, restricted network access and rollback.

TECHNICAL CAPABILITIES

Systems: Linux, Proxmox VE, Docker, Docker Compose, self-hosted services, TrueNAS, storage and backup operations.

Automation: Notion databases, relations, rollups and automations; n8n; API-connected workflows; process documentation.

Technical delivery: Industrial machine vision, software configuration, commissioning, troubleshooting, remote support and customer training.

Design & coordination: Revit, AutoCAD, equipment data, technical drawings, project plans and contractor coordination.

EARLIER EXPERIENCE

Shop Assistant 3 | Total Show Technology, Las Vegas, NV

Jan 2016 - Feb 2018

Supported AV installation and troubleshooting, event operations, equipment preparation and inventory.

EDUCATION & CERTIFICATION

Google Cybersecurity Professional Certificate | Coursera | May 2025

Coursework and labs in SIEM, IDS, Linux, SQL, Python, risk assessment and incident response.

Bachelor of Science in Computer Science | University of the People

In progress
